## PERSONAL PROJECTS

### Recipe organiser

- A recipe organizer is a application designed to help individuals manage and organize their collection of recipes. It provides a centralized platform where users can store, categorize, search, and access their favourite recipes easily.
- Recipes can be categorized based on different criteria such as cuisine type, meal type (breakfast, lunch, dinner), dietary preferences (vegetarian, gluten-free, etc.), or special occasions (holidays, parties)

### Pregnant Women Caring website

- Health Tracking, Education & Information. Reminders, Community Support, Emergency Assistance, Fitness and Nutrition

### Hospital Management System

- It contain Patient Module ,Doctor Module ,Admin Module
- Patient Module: This module allows patients to create their account, book an appointment to see a doctor and see their appointment history.
- Doctor Module : Doctor can able to see their appointments which has been booked by the patients.

### Diabetic Retinopathy

- Diabetic Retinopathy is an AI project aimed at image analysis using a Convolutional Neural Network (CNN) architecture.
- It includes steps for data preprocessing, augmentation, and model training, possibly for tasks like classification or detection.
- The workflow involves downloading images, processing them (crop, resize, rotate), and training a CNN model to achieve high performance on the dataset.

## SKILLS

Basic in C

DSA

OOPS in JAVA

HTML,CSS

JavaScript

React

SQL
